PROFESSIONAL EXPERIENCE

- Student Junior Front-End Developer**
TECHGROUNDS/SCRIMBA/CODE WITH MOSH 2020-2020
Hyacinthia has her own eclectic style and is very creatively skilled. She really wants to learn how to create beautiful animated websites and is very eager to learn and evolve herself to get this done.

That's why she started an online course to become a Full Stack Web Developer in 2019 followed by the remote Web Development coding program from TechGrounds.

This coding program is very intense but you will be able to work as a Junior Web Developer afterwards. In this course they will teach you how to work with: HTML5, CSS, JavaScript, SASS, Bootstrap, REACT and more.

After six months you will still have the possibility to develop and improve your coding & soft skills true the community of TechGrounds & of course an employer who is willing to fine-tune your skills.
